POLYVINYL CHLORIDE

PVC MEMBRANE (50-Mil, 60-Mil & 80-Mil) Used in mechanically attached and fully adhered roofing systems in new construction, reroofing and recover (retrofit) applications. It may also be used as flexible membrane flashings for walls, curbs, etc, when installing PVC membrane roofing systems. The system must be installed over acceptable roof insulation or other suitable substrate. See the Mule-Hide PVC Specifications Manual for complete specifications and details. The physical properties of the membrane are enhanced by a tenacious, weft-inserted polyester fabric. Meets or exceeds all requirements of ASTM D4434, Type III.

PVC MEMBRANE MINIMUM (60-Mil Minimum) Manufactured to a minimum 60-mil sheet thickness.

PVC KEE HP MEMBRANE (50-Mil, 60-Mil & 80-Mil) Manufactured using DuPont® Elvaloy® resin modifier and provides outstanding thermal stability and flexibility, extended upper and lower temperature performance limits and enhanced chemical resistance. The physical properties of the membrane are enhanced by a tenacious, weft-inserted polyester fabric. Meets or exceeds all requirements of ASTM D4434, Type III.

PVC FLEECE BACK MEMBRANE (45-Mil, 60-Mil, 80-Mil) Used in fully adhered and mechanically attached roofing systems in new construction, reroofing and recover (retrofit) applications.

PVC KEE HP FLEECE BACK MEMBRANE (45-Mil, 60-Mil, 80-Mil) Used in fully adhered roofing systems in new construction, reroofing and recover (retrofit) applications. The polyester fleece backing enhances the puncture-resistance of the membrane and can also serve as a built-in separation layer for rough surfaces or existing asphalt-based roofing systems.

PVC ADHESIVES & SEALANTS

HYDROBOND® WATER-BASED PVC BONDING ADHESIVE

Designed to bond PVC membranes to a clean, dry, horizontal surface as a one-sided wet lay-in adhesive with slopes up to 2:12. HydroBond® can be used with both smooth back and fleece backed PVC membranes. Can also be used as a contact adhesive for vertical applications, such as flashings.

*Not approved for Standard PVC KEE HP

PVC

LOW-VOC PVC BONDING ADHESIVE

A high-strength solvent-based contact adhesive that allows bonding of PVC membranes to various porous and non-porous substrates. It is specially formulated using a blend of VOC-exempt and non-exempt solvents to be in compliance with the California Clean Air Act of 1988 (updated in 1997) and as further regulated by California's Air Quality Control Districts listing VOC limitations. POLY-ISO FLAT & TAPERED (4'X4' OR 4'X8')

Mule-Hide Poly ISO (flat) and Tapered insulations consist of a closed-cell polyisocyanurate foam core laminated to heavy, (non-asphaltic) glass fiber reinforced felt facers. The product insulations are compatible with all Mule-Hide membranes and accessories and are available in 20 and 25 psi densities. Mule-Hide Poly ISO insulation boards may be used for ballasted, mechanically attached and fully adhered single-ply roofing systems. Poly ISO insulation board may be installed over approved decks and substrates on new construction, tearoffs and recover (retrofit) projects. Rated for use in UL Class A and FM Class 1 assemblies.

POLY ISO 1-HD

Mule-Hide Poly ISO 1-HD is 1/2" thick, 100 psi high-density polyisocyanurate insulation board specifically designed for use as a cover board. Consists of a closed-cell polyisocyanurate foam core laminated to premium performance coated glass fiber felt facers. Mule-Hide Poly ISO 1-HD is designed for use as a cover board over roof insulation boards or existing membranes. Compatible with single-ply roofing systems (ballasted, mechanically attached and fully adhered) and modified bitumen roofing systems, on new construction, tearoff and recover (retrofit) projects. Suitable for use with approved fasteners and plates, and low-rise foam adhesive. Poly ISO 1-HD can achieve a FM hail resistance rating of SH-1 with certain membranes.

MULTI-SYSTEM ACCESSORIES - AIR & VAPOR BARRIER

F5 AIR & VAPOR BARRIER

A 40-Mil composite consisting of 35-Mils of self-adhering rubberized asphalt laminated to a 5-Mil woven polypropylene film. A siliconized one-piece release liner prevents the material from bonding to itself in the roll and is easily removed for installation. F5 Air & Vapor Barrier is available in a 325 sq. ft. roll with dimensions of 39"x 100". The factory-controlled thickness of the membrane ensures uniform barrier properties, and the woven polypropylene film increases strength and has a non-skid surface suitable for the bonding of subsequent layers.
